

Magnify™ Call Reporting Software for Windows

Get a closer look at what's happening on your telephone system!

- Get detailed reports of personnel call activity
- Identify local, long distance, and international calls being made
- Determine how busy your telephone lines are
- Determine how busy each extension is
- Improve efficiency by identifying bottlenecks
- Track clients through the use of account codes

Highlights:

- Your choice of 5 different report types: Extension, Line Number, Phone Number, Account Code, or Call Duration
- Report on inbound calls, outbound calls, transferred calls, or any combination
- Optionally specify date/time range, extension range, or line number range
- Reports are in HTML format and can be emailed if desired—the recipient does **not** need any special software to view the report!
- Clicking on any phone number in a report will activate a reverse lookup feature, allowing you to quickly tell who that phone number belongs to (when info is available)
- Main screen shows the last 10 calls that took place, allowing you to see at a glance the most recent call activity

System Requirements:

- PC computer with Windows XP, Vista, 7, or 8 operating system
- 512 MB RAM
- Disk space depends on database size (100 MB recommended)
- Ethernet connection
- Microsoft Internet Explorer
- Phone system capable of accepting a TCP/IP connection for reporting of call information
